Date: June 5, 2019  
Location: Dallas, Texas

US Sport Planes, importer for Jabiru Aircraft, has expanded its facilities. The expansion includes more office area and increased hangar space.

“With the continuing demand for new and used aircraft in the Light Sport and Four Place market, we’ve needed more room. Having more hangar space to show some of the used Jabirus we broker, along with new aircraft in one location gives our customers the opportunity to really compare the aircraft and choose the perfect Jabiru for their needs. The newer office space improves our presence and organization at Denton Airport. We enjoy matching new owners with the right aircraft, whether new or previously enjoyed!” Commented Scott Severen, president of US Sport Planes.

US Sport Planes promotes “All Things Jabiru” at Denton Airport, KDTO: New and previously enjoyed aircraft sales, maintenance and repair services, and flight training and pilot transition in a Jabiru LSA by In The Pattern. US Sport Planes in North Texas is the North American Importer for the Jabiru Light Sport and 4 place Builder Assist Kits of Jabiru Aircraft Pty Ltd of Australia. For more
