

Terms of Purchase and Shipping Information for Jabiru Kit Aircraft

1. **Payment:** A 50% deposit is required to initiate an aircraft kit order. 100% on props and engines. This initial deposit can be made with a certified check, wire transfer, money order, company check or personal check.
2. **Final Payment:** The balance of your payment is due prior to shipment from Australia. We will contact in advance of the ship date so that this final payment does not hold up your order. Final payment should be made with a certified check, money order, or a wire transfer.
3. **Sales Tax:** Sales tax is not added to shipments that are shipped out of the state of Texas. Shipments within the state of Texas will be charged sales tax at the rate of the delivery destination. For out of state customers who are picking up a kit at our headquarters in Texas, the customer must complete a notarized sales tax affidavit that defers sales tax to your state of residence.
4. **Engines:** With the purchase of a Jabiru kit, you are entitled to buy the Jabiru engine (with the kit or later) at a reduced rate. The price will be based on our published price at the time of purchase.

The warranty period (24 months or first 500 hours, whichever comes first) must begin at delivery. For many home building projects, even for those who plan to finish in a short period of time, unexpected circumstances sometimes change plans. Order your engine just a few weeks before you will be ready to install it.

Customer pays freight charges on all engine shipments, no matter if shipped with the kit or shipped separately later.

5. **Delivery Dates:** Depending upon demand, delivery dates vary. Kits are typically shipped within 12 weeks. Please inquire at the time of purchase about current delivery times. However, during high demand times this time can run longer. An expected delivery date will be given at the time of order. However, this is not a guarantee and is subject to change.
6. **Shipping:** FOB Denton, TX or Shelbyville, TN. Kit shipments are sent by truck and are freight-collect, meaning you pay the freight charges when it arrives at your door. You can arrange to have your kit shipped to the local terminal, which would provide you with a discount but you must let us know prior to shipping if you would like to do this. The trucking company is instructed to call you prior to delivery. At that time, you can inquire about the freight charges and the methods of payment they will accept.

It is the responsibility of the person receiving the freight to have a way to offload or load the crates when they arrive. The freight company might be able to help, but they typically don't carry forklifts or dollies. You can also request "lift-gate" service for an additional cost through most freight companies. Be aware that kits are large and heavy, and will require a forklift or a lot of strong people to help offload.

7. **Crate Sizes:** Wings: 183.6" x 44" x 16.5" Fuselage: 209" x 45.7" x 45.7"
Base: 183.7" x 44" x 6" Engine: 32.3" x 28.4" x 22.6"

8. **Kit Arrival:** Carefully examine all of the crates and/or boxes upon arrival and note any damage on the bill of lading that the freight company has you sign. This will greatly expedite your claim. If you don't inspect before signing, you reduce your leverage in filing a claim for any damage, so don't skip this important step!

9. **Damaged Shipments:** If you have damaged freight from a trucking company, please contact them immediately to start the claim process. Contact information can be found on the bill of lading that you signed at delivery. US Sport Planes is not responsible for damaged freight, but we certainly will help you through the claim process.
10. **Missing Parts:** Jabiru checks, re-checks and triple checks packing and are 99.9% certain that if we say it shipped, it did. The first task in building your kit is to inventory the parts using the packing list provided. It's your job to keep all parts organized and accounted for upon receiving your kit. We cannot provide "missing" parts at no charge after 60 days.
11. **Canceled Orders:** Due to the custom nature of our product, cancellations will result in loss of deposit.
12. **Returned Goods:** A Jabiru kit aircraft is purchased as a complete kit. The only exceptions are kits sold less engine. US Sport Planes cannot issue credit or refund unused items from the original kit.
13. **Continued Supply:** We cannot guarantee continued supply of any items, outside of the scope of manufacture. This includes, but is not limited to: engines, props, instruments, sensors for instrumentation, wheels, brakes, tires.

Thank you for choosing Jabiru!
